

**THE ECOFRIENDLY PAPER STRAW
FOR FOOD SERVICE**

ABOUT EZYPLANET

PAPER STRAWS THAT LAST **5X** LONGER THAN ANY OTHER

Ezyplanet paper straws has been introduced in the market in 2018 in response to a growing demand for eco-friendly straws to replace the plastic ones. When this big movement arise, most of the food service customers started to use what was available in the market: the party style straw. Consumer reaction to this has been very bad because of the quality of the straw as a “party quality” product never is as good as a “food service grade”. For that reason, we decide to introduce the first Food Service Grade straw in the market, developing high quality paper straws for a good consumer experience

5X More satisfaction and great customer experience

General consumers reaction to paper straws was bad at the very beginning. People were saying that beverages takes the flavor of wet paper or even worst the “mouth-feel of cellulose dissolving on your tongue”. At Ezyplanet we changed that. More than an eco-friendly alternative, Ezyplanet is a truly good experience for your customer. Our straws last 5X more than most of the straws in the market keeping the same compostable, safe and eco-friendly properties.

EZYPLANET IS CERTIFIED GREEN

Different than many other alternatives to plastic straws, Ezyplanet is more durable but also, helps reduce plastic pollution by decomposing in just 45 days or less!

PRODUCTION CAPACITY: 100MM /MONTH

DID YOU KNOW?

Plastic straws are made of polypropylene, a petroleum by-product & the same stuff that fuels our vehicles

All plastic, including bio-plastics, plant-plastics, and PLA plastics are harmful to the marine environment

Each day we use 500,000,000 straw; enough to fill 46,400 large buses per year

Plastic straws are among the top 10 debris items, 44% of all sea birds and mammals have ingested plastic

90% of all trash floating in the world's oceans is comprised of plastic

In the last 25 years, 6.263.213 straws and stirrers were picked up during annual beach clean up events

CERTIFICATIONS AND QUALITY CONTROL

FDA Compliant. Our straws have been tested and approved to be in compliance with FDA test method 21 CFR 176.170

Food Safe Tested. Inks used for printing on the surface of our drinking straws have been tested, certified and are guaranteed acceptable for direct contact with food products. All chemical components used are proven to be safe as tested. All raw material and process components used are free of any fluorochemicals/fluorinated compounds

Biodegradability. All our products are biodegradable certified by the international agency ASTM in order to guarantee a safe product for our marine ecosystems

Compostability. Ezyplanet meets the untreated paper substrate requirement for its acceptance in commercial composting processes and is verified to be fluorine free.

Business Social Compliance Initiative

The Papers used in the composition of our products are in compliance to Forest Stewardship Council (FSC). This paper based material comes from a sustainably managed forest with chain-of-custody procedures in place

REGULAR STRAWS
